ELECTRONICS AND COMMUNICATIONS IN JAPAN

Part 2: Electronics

VOLUME 72

CONTENTS FOR 1989

NUMBER 1

Page

Kimihiko Shibata, Minoru Emura and Shojiro Yoneda: High-Voltage Switched-Capacitor Circuit and Its Application to Tracking Amplifier 1

Masakatsu Ikeda, Tatsuya Niimi, Chisato Hashimoto, and Hideo Oikawa: Thermal Oxidation of Tantalum Thin Film 11

Yoshinori Kajiki, Hideya Takahashi, Kenji Matsushita, and Eiji Shimizu: A Pattern Classification System Using Computer-Generated Fourier Hologram . 19

Kiyoshi Ise and Masanori Koshiba: Numerical Analysis of H-Plane Waveguide Junctions with Dielectric Posts by Combining Finite and Boundary Elements . 29

Koichi Mizutani and Kohji Toda: A Differential Phase-Shift Keying Modulation by an Ultrasonic Method 40

Tsuyoshi Toda, Kazuo Shigematsu, Masahiro Ojima, and Masashi Yoshihiro: Analysis of Signal-to-Noise Ratio in Magnetooptical Disk Using a Polarization Simulator 49

Nobuhiro Funakoshi: Numerical Studies on the Erasing Condition by a Circular Beam Irradiation for the Phase-Change Rewritable-Type Optical Disk 58

Minoru Saitoh and Toru Takeda: Optical Disk Redundancy Design Considering Bit-Error Characteristics 65

Fumio Tanabe, Osamu Asada, and Kenzo Tsuji: Thermo-History Control Simulation in Thermal Transfer Printing 76

Yutaka Fukuoka, Eiji Okada, Hideyuki Yano, and Haruyuki Minamitani: Two-Dimensional Laser Doppler Velocimeter Using Pulse-Modulated Laser Diodes . 89

Kinya Oigawa, Shinichiro Uekusa, Yoshinobu Sugiyama, and Munecazu Tacano: Self-Aligned InP MISFET 98

Yasuo Shibata, Hiroshi Ojima, Yasuhiro Katsumata, and Hiroshi Kuwano: Influence of Pt Ions in SiO_2 Films on Nonvolatile Memory Effects in Pt-Diffused MOS Devices 106

NUMBER 2

Shinnosuke Sawa, Kazuo Ono, Naoki Norimatsu, and Kouji Kakemizu: Computer-Aided Estimation of Refractive-Index Profile of Optical Waveguides from Propagation-Mode Near Field Pattern 1

Shinzo Muto, Akio Ichikawa, Ken-ichi Okuda, Masato Kawai, and Hiroshi Ito: Properties of Optical Retardation Plates by Easily Prepared Birefringent Bulk Plastics . . . 11

Kaoru Hashimoto and Koichi Niwa: Effect of Dielectric Constant on Characteristics of Transmission Lines Formed in Multilayer Ceramic Circuit Board 16

Taichi Nakamura: Multilevel Storage Memory Using Serial-Parallel-Serial Charge-Coupled Device 23

Tsuneo Tsukahara and Masayuki Ishikawa: CMOS Comparator Suitable for Mixed Analog-Digital LSIs 35

Fumio Tanabe, Osamu Asada, and Kenzo Tsuji: Thermo-History Control Simulation in Thermal Transfer Printing 76

Yutaka Fukuoka, Eiji Okada, Hideyuki Yano, and Haruyuki Minamitani: Two-Dimensional Laser Doppler Velocimeter Using Pulse-Modulated Laser Diodes . 89

Kinya Oigawa, Shinichiro Uekusa, Yoshinobu Sugiyama, and Munecazu Tacano: Self-Aligned InP MISFET 98

Yasuo Shibata, Hiroshi Ojima, Yasuhiro Katsumata, and Hiroshi Kuwano: Influence of Pt Ions in SiO_2 Films on Nonvolatile Memory Effects in Pt-Diffused MOS Devices 106

NUMBER 2

Shinnosuke Sawa, Kazuo Ono, Naoki Norimatsu, and Kouji Kakemizu: Computer-Aided Estimation of Refractive-Index Profile of Optical Waveguides from Propagation-Mode Near Field Pattern 1

Shinzo Muto, Akio Ichikawa, Ken-ichi Okuda, Masato Kawai, and Hiroshi Ito: Properties of Optical Retardation Plates by Easily Prepared Birefringent Bulk Plastics . . . 11

Kaoru Hashimoto and Koichi Niwa: Effect of Dielectric Constant on Characteristics of Transmission Lines Formed in Multilayer Ceramic Circuit Board 16

Taichi Nakamura: Multilevel Storage Memory Using Serial-Parallel-Serial Charge-Coupled Device 23

Tsuneo Tsukahara and Masayuki Ishikawa: CMOS Comparator Suitable for Mixed Analog-Digital LSIs 35

Page

Mikio Ogai, Akira Iino, and Kunihiro Matsubara: Infrared Transmission Loss Increase of Germania-Doped Silica Fiber Caused by Hydrogen and Its Mechanism 44
Masatoyo Sumida and Kenji Takemoto: Aberration of GRIN-Rod Lenses in Single-Mode Optical Fiber Devices 57
Shinnosuke Sawa, Kazuo Ono, and Seiji Mori: Design Considerations for Mode-Conversion Type Optical Branching Waveguides 65
Shigenobu Shinohara, Hirofumi Yoshida, Edson Toshiaki Shimizu, and Masao Sumi: Approximate Theory and Characteristics of Laser Doppler Velocimeter Using Self-Mixing Effect of Semiconductor Laser Diode 79
Tadafumi Ohke, Yoshiro Tomabechi, and Kazuhito Matsumura: Coupled Mode Theory of Parallel Multi- and Single-Mode Dielectric Waveguide 91
Seiichi Mitobe and Masanori Koshiba: Equivalent Circuit Model for Positive/Negative Reflection-Type SAW Reflectors 101

NUMBER 3

Mitsuo Hano: Finite-Element Solution of Three-Dimensional Resonator Problems. Novel Tetrahedral Element 1
Masahiro Hashimoto: Geometrical Optics Field of Guided Waves. A Geometrical Interpretation for the Field Amplitude 10
Tadahiko Maeda, Kunio Sawaya, Saburo Adachi, and Yasuto Mushiake: Asymptotic Approximation and Experimental Study of Electromagnetic Fields Excited by an Electric Dipole Located over a Conducting Concave Spherical Surface 19
Michihiko Nagao, Yooichi Machitani, and Tadao Nakano: Characteristics of MOS-FET PWM Inverter with High Carrier Frequency 29
Itsuo Sasaki, Shojiro Yoneda, and Tamotsu Kasai: Phase-Synchronous-Type Walsh Analyzer Using Switched-Capacitor Circuit 42
Moriaki Fuyama, Masanobu Hanazono, Mitsuru Ura, and Haruhiko Honda: Formation of (Hf·Ti)C Film on Cemented Carbide Tools by Low-Pressure Chemical Vapor Deposition 50
Kei-ichi Yasuda, Kenichi Nakano, Yasuhiro Ando, and Tsuneo Kanai: Insertion Force Reduction in Multipin Connectors with Various Tip Shapes 61
Takeshi Kinoshita and Ko-ichi Sano: A Programmable Optical Demultiplexer Using a 32-Element Photodiode Array 71
Atsushi Ide and Masao Tachikura: Fiber Misalignment Measurement Method Using One-Directionally Observed Image 81
Toshiaki Tanaka, Kikuo Tsunoda, and Masayoshi Aikawa: Slot-Coupled Directional Couplers on a Both-Sided Substrate MIC and Their Applications 91
Makoto Minakata, Toshikazu Sakano, and Shojiro Kawakami: Miniaturized Directional Coupler-Type Optical Switches 100
Hirosei Inuzuka, Yasuyuki Okamura, and Sadahiko Yamamoto: Nonreciprocal Phase Characteristics of Single-Mode Magneto-Optic Rib Waveguides 107

NUMBER 4

Masahiro Morikura, Kiyoshi Enomoto and Shuzo Kato: Design Method of General-Purpose and High-Speed Digital Correlator LSI 1
Hirochika Nakajima, Ippei Sawaki, Minoru Seino and Takashi Yamane: Bipolar-Voltage-Controlled Optical Switch Fabricated on Z-Cut Ti:LinbO_3 Intersecting Waveguides 12
Masaru Nakamura, Hideto Furuyama and Atsushi Kurobe: High-Speed, Zero-Bias Modulation of Low Threshold MQW Laser Diodes 20
Hiraaki Tsujii, Kiyoshi Ohnaka and Jun Shibata: InP LD with PD Fabricated by Br_2-Reactive-Ion-Etching Technique 26
Mamoru Uchida, Kiyoshi Asakawa, Shohei Matsumoto and Hideo Kawano: An Integrated AlGaAs Two-Beam Laser Diode-Photodiode Array Fabricated with Reactive Ion Beam Etching 33
Kiyoshi Ohnaka, Hiraaki Tsujii and Jun Shibata: Monolithic Integration of LD/HBTs on a Semiinsulating InP Substrate 44
Masaaki Tojo, Kenichi Matsuda, Minoru Kubo and Jun Sibata: OEIC Photoreceiver Using InP System with a 5-V Source Voltage Supply 52

Page

Kenichi Matsuda, Minoru Kubo, Mototsugu Ogura and Jun Shibata: Approach to High-Speed Operation of InGaAs/InP Monolithic PIN/Amplifier 60
Shigeo Sugou, Kenichi Kasahara, Shigeru Murata, Yoshihiro Koizumi, Naotaka Kuroda, Tomoo Yanase, and Yoshitake Kato: Selective Embedding Epitaxial Technique of Highly Resistive InP for OEIC's Device Isolation 68
Kazuya Hayata, Kazunori Miura and Masanori Koshiba: Vectorial Finite-Element Formalism for Electromagnetic Waveguiding Structures with Loss and/or Gain 77
Kazuya Hayata, Michio Nagai and Masanori Koshiba: Finite-Element Formulation for Nonlinear Dielectric Slab Waveguides 85
Mitsuo Hano: Efficient Finite-Element Formulations for Analyzing the Propagation Characteristics of Waveguides 94
Kiyoshi Tsutsumi, Tetsuya Mizushima, Hiroshi Hirai and Yoshiharu Yuba: Diffused Ion Concentration Profiles of Ion-Exchanged Glass Optical-Waveguides 103

NUMBER 5

Akira Fuke, Katsuhiko Masuda, and Yasuhiro Tokita: Optogalvanic Effect on a Hollow Cathode He-Cd^+ Laser 1
Kazuhito Matsumura, Yoshiro Tomabechi, and Noriaki Tsuchiya: Coupling Characteristics of Crossover Arranged Rectangular Dielectric Waveguides 8
Kentaro Setsune, Takeshi Kamada, Kumiko Hirochi, Hideaki Adachi, and Kiyotaka Wasa: Preparation of Superconducting Thin Films of a New Oxide System by rf Magnetron Sputtering 17
Kohji Toda and Heijiro Urabe: Equivalent Circuit Analysis of Performance of Acousto-Optic Deflector Using Liquid-Loaded Interdigital Transducer 27
Yuji Funabiki and Toshitaka Kojima: Analysis of the Light-Beam Scattering and the Sum and Differential Signal Output by Arbitrarily Shaped Pits and Bosses 37
Yasutaka Uchida, Shunri Oda, and Masakiyo Matsumura: Amorphous-Silicon Thin-Film Transistors and Their Integrated Circuits 48
Masahiro Hashimoto and Akira Komiyama: Two-Dimensional Ray Tracing for Wavefronts, Wave-Normal Rays and Geometrical Optics Fields 61
Naoki Masuzuka, Norinobu Yoshida, and Ichiro Fukai: Transient Analysis of Three-Dimensional Electromagnetic Field in Through-Holes 69
Ken Ichi Ara, Yohsuke Ohoka, and Yukio Wakui: Preparation and Magnetic Properties of Anodic Oxide Magnetic Films 81
Takayoshi Kubono and Shinji Teraoka: Relationship between the Contact Resistance and the Temperature Near Electrical Contacts Switching Continually 89
Masanori Matsuhara, Ichihiko Toyoda, and Hisazumi Shirae: Analysis of a Bending Dielectric Slab Waveguide by Integral Equation Formulation 97
Mitsuo Makimoto: Microstrip-Line Split-Ring Resonators and Their Application to Bandpass Filters 104

NUMBER 6

Takashi Tadokoro, Fumio Koyama, and Kenichi Iga: Classification of Etching Mechanism in Reactive Ion Beam Etching 1
Kazunori Moriki, Yoshikazu Nishino, Takeo Hattori, and Kenichi Iga: Analysis of Dynamic Wavelength Shift for Surface Emitting Laser 7
Takeshi Kinoshita and Ko-Ichi Sano: Design and Performance of a Tunable Optical Demultiplexer Using an Acousto-Optic Light Deflector 14
Masahiro Geshiro and Shinnosuke Sawa: Analysis of Leaky Waves in Anisotropic Slab Waveguides 25
Shinzo Yoshida and Kohji Toda: Orientation of a Pb_2CrO_5 Thin Film on a Glass Substrate Prepared by an Electron Beam Evaporation Technique 34
Toshiro Sato and Yo Sakaki: Mechanism Generating Power Losses in MHz Band in Polycrystalline Mn-Zn Ferrite Cores Used for Switching Power Supplies 42
Takashi Matsuoka, Toshiro Sato, and Yo Sakaki: Dimension Dependence of Power Losses in Polycrystalline Mn-Zn Ferrite Cores 51
Yutaka Shimada and Tugio Ide: High-Rare Sputtering of Ferromagnetic Materials by a U-Shaped Target 57

Page

Kohji Toda and Shinzo Yoshida; Impedance Analysis of Photoelectric Properties in Construction of Metal/Pb_2CrO_5/SnO_2 64

Atsushi Okamoto, Kunihiro Sato, Teruhito Mishima, and Ichiro Sakuraba: Optical Transfer Properties of Two-Photon-Pumped Image Upconverter-in the Case of Plane Wave Pumping 72

Shinnosuke Sawa, Kazuo Ono, and Masahi Yamasaki: Fabrication of Single-Mode Optical Channel Waveguide from Dilute Silver Nitrate Melts by Two-Step Diffusion Technique 80

Hirotsugu Fukuoka, Hiroshi Fukui, and Kanji Kawakami: Eddy Current Effect on Reproducing Process for Thin-Film Magnetic Head 89

Koichi Hirayama and Masanori Koshiba: Analysis of Discontinuities in an Open Dielectric Slab Waveguide by Combination of Finite and Boundary Elements 98

Rumiko Yamaguchi and Susumu Sato: Dispersion Properties of Refractive Indices of Nematic Liquid Crystals 108

NUMBER 7

Kouji Terashima, Norinobu Yoshida, and Ichiro Fukai: Three-Dimensional Analysis of Electromagnetic Fields for NRD Guide with Air Gap and Finite-Metal Plane Width 1

Sadayuki Okada, Hisao Sonobe, and Rokuroo Miyazaki: Fiber-Optic Gyroscope by Interference Fringes of Bifocal Lens Optical System 15

Yoshifumi Yamada, Takehiko Hayashi, Kunio Tanaka, and Zenmonn Abe: Spatial Resolution in NMR Fresnel Transform Imaging 24

Yoji Nishio, Fumio Murabayashi, Shoichi Kotoku, and Shinji Kadono: High-Speed Hi-BiCMOS Gate Array with RAM 33

Jun Nitta, Fumio Koyama, and Kenichi Iga: Pulse Operation of GaAs/AlGaAs Surface-Emitting Laser-Type Optical Threshold Device 43

Shoji Yamaguchi, Akira Shimojima, and Toshio Hosono: Analysis of Transmission Characteristics of Image Fiber-Dependence on Higher Modes and Wavelength 51

Koji Hasegawa and Masanori Koshiba: Analysis of Reflective SAW Gratings for SH-Type Modes Using Finite-Element Method 62

Ken-ya Hashimoto and Masatune Yamaguchi: Estimation of Acoustic Wave Radiation from an IDT by Use of Effective Permittivity 71

Naoki Morita: Multinozzle Drop Generator for Continuous Ink Jet Printing 78

Terutaka Tamai: Growth of Oxide Films on the Surface of Cu Contact and Its Effect on the Contact Resistance Property 87

Kazuhisa Yoshida, Akira Motoyama, Mitsuo Isagawa, and Youichi Miyazaki: Study of Contact Phenomena in the Vaporized Organic Gas Atmosphere 94

Hideaki Sone, Tasuku Takagi, and Masao Nakai: Measurements on the Influence of Metallic Phase Arc on Electrode Surface for Breaking Ag Contacts 101

Osamu Miura, Kunio Miyazaki, Shunichi Numata, and Hiroshi Watanabe: Copper-Polyimide Interaction during Imidization Process of Polyamic Acid Solution to Polyimide 107

NUMBER 8

Kunio Tada, Hideki Hayashi, and Satoki Kawanishi: GaAs-AlGaAs Double-Heterostructure Coupled-Waveguide Optical Modulators and Their High-Frequency Modulation Characteristics 1

Masaki Kumanoya, Katsumi Dosaka, Yashuhiro Konishi, Tsutomu Yoshihara, Hideshi Miyatake, Yuto Ikeda, and Isao Furuta: An Optimized Design for High-Performance Megabit DRAMs 14

Iwata Sakagami and Kozo Hatori: Responses of Digital Frequency Multipliers Consisting of Coupled-Lines to Trains of Periodical Gaussian Pulses 24

Takakazu Kurokawa, Yoshiaki Ajioka, and Hideo Aiso: Matrix Solver with Three-Dimensional VLSI Technology 34

Hiroshi Yoshikawa, Yutaka Ohno, and Hisakazu Kimoto: Analysis of Two-Core Single-Mode Optical Fibers for Subscriber Lines 45

Isao Minowa and Makoto Kanno: Automatic Measurement for Investigation on the Contact Surface Using Nonlinear Characteristics 54

Page

Masanori Matsuhara and Tuptim Angkaew: Analysis of the Waveguide with Loss or Gain by the Finite-Element Method 61
Kazuhiro Inoue, Kazuya Hayata, and Masanori Koshiba: Finite-Element Solution of Three-Dimensional Periodic Waveguide Problems 68
Yasunori Nakata and Masanori Koshiba: Boundary-Element Analysis of Plane-Wave Diffraction from Metallic Gratings with Arbitrary Complex Permittivity 78
Shigetaka Takagi, Nobuo Fujii, and Takeshi Yanagisawa: High-Frequency Monolithic Differential Input/Output Integrator 87
Digh Hisamoto, Tohru Toyabe, and Eiji Takeda: Alpha-Particle Induced Source-Drain Penetration (ALPEN) Effects 96
Takashi Sato, Shungo Koizumi, Toshinori Saito, and Minoru Shimba: Frequency Stabilization of a Semiconductor Laser under Modulation 103
Osamu Miura, Hiroshi Watanabe, Kunio Miyazaki, and Shunichi Numata: Properties of Polyimide Films Cured on Copper 111

NUMBER 9

Kozaburo Kurita, Takashi Hotta, Hideo Maejima, and Atsuo Hotta: Study of BiCMOS Cache Memory 1
Satoshi Ichikawa and Takashi Karasudani: Steady-State Analysis of Electromagnetic Field by Vertical Electrical Dipole over Lossy Ground 10
Tsuyoshi Dobashi, Toshiji Umezawa, Katsutaka Sasaki, and Atsushi Noya: Influence of the Ta Migration on Dielectric Properties of Anodized Al-Ta(N)-Al Trilayered Oxide Films 21
Kenji Nakamura, Akira Shimizu, Masanori Koshiba, and Kazuya Hayata: Finite-Element Formulation of Quantum Wells using Transfer Mstrix 29
Tadasu Sunada: Direct Butt Coupling Type of LED Module with Multiple Output Fibers 39
Zhen Wang, Katsuyoshi Hamasaki, Tsutomu Yamashita, and Toshiaki Matsui: Current-Voltage Characteristics of All-NbN Nanobridges 48
Takakazu Kurokawa and Hideo Aiso: A Proposal for Polynomial Transformer and Its Design using 3-D VLSI Technology 56
Hirotaka Nakatsuka, Norinobu Yoshida, and Ichiro Fukai: Three-Dimensional Electromagnetic Analysis of a Vacuum Window Involving Waveguides 65
Toshihiro Nomoto: 12-GHz Band Triple-Mode Filters with Waveguide Ports—Comparison and Consideration of Two Kinds of Filter Structures 77
Masaaki Takahashi, Kazuji Yamada, Takahiko Oukouchi, Kiyoshi Kanai, and Koichiro Kurihara: Development of Mo Metallization Process of AlN Ceramic Surfaces . . 86
Shiro Nagaoka, Katsuyoshi Hamasaki, Akinobu Irie, Tsutomu Yamashita, and Masanori Kougo: All-NbN Nanobridges for DC SQUID Application Produced by Field Emission 96
Yasushi Ito: Ultrabroadband Amplifiers Using Hybrid Circuits 103
Makoto Tsutsumi and Tomoyuki Takeda: Analysis of Microstrip-Magnetostatic Wave Resonators 112

NUMBER 10

Kazuo Sato, Yoshiki Fukuzaki, Shinichi Hatakeyama, and Nobuyuki Ikeda: Tunnel-Oxide Breakdown Characteristics of Floating-Gate-Type EEPROM 1
Masaaki Imai and Akira Odajima: Fiber-Optic Phase Modulator Using Piezoelectric Copolymer Coating 9
Takeshi Yano and Sadayuki Takahashi: Utilization of Piezoelectric Stiffened Effects on Impact Printer Heads 19
Hidetaka Satoh: Transient Temperature Response of Avalanche Diodes against Lightning Surges 33
Kiyoshi Fukui, Shigeji Nogi, Seiji Ohishi, and Satoshi Tanaka: Parallel-Running of Two Cylindrical Cavity Multiple-Device Oscillators 40
Shuichi Shoji and Masayoshi Esashi: Fabrication of a Micropump for Integrated Chemical Analyzing Systems 52
Ryuji Yamada and Nagayoshi Morita: Electromagnetic Fields in Circular Bends of Slab Waveguides 60
Akira Hyogo and Keitaro Sekine: A Synthesis of Reduced Ripple Switched-Capacitor Current Sources and Their Applications 70
Sachihiro Toyoda: Microwave Band Push-Pull Power Amplifiers 77

Page

Yoshio Abe, Moriaki Foyama, Ken'ichi Onisawa, and Yoshimasa A. Ono: Effects of the Cell Structure on ZnS:Mn EL Characteristics 87
Osamu Fujiwara, Takeshi Kondoh, Kazuo Katoh, and Takashi Azakami: A Measurement Method for Visualization of Static Electricity Distribution 96
Kazuya Hayata, Kazunori Miura, and Masanori Koshiba: Full Vectorial Finite-Element Formulation for Anisotropic Waveguides with Complex Permittivity Tensor 105

NUMBER 11

Masataka Nakamura, Mitsuo Okine, Takanori Shigehiro, and Tatsuya Ishizaki: Simulation of Low-Noise Inductance with High-Q 1
Masahiro Toki, Shinichi Hattori, and Hirokazu Nakano: Bridge Measuring Method of Active Impedance of Crystal Oscillator Circuits 10
Naoki Fukutomi, Yorio Iwasaki, Fujio Kojima, Hiroharu Kamiyama, Masahide Asai, and Nobuo Kawada: High-Density Wiring Technology in Multiwire Boards 17
Toshio Kumamoto, Masao Nakaya, Shigeru Kusunoki, Tadashi Nishimura, Nobuharu Yazawa, Yoichi Akasaka, and Yasutaka Horiba: An SOI/CMOS Flash A/D Converter 30
Kazuaki Hotta, Motohiro Arai, and Sinji Ito: High-Effeciency High-Repetition Rate KrF Excimer Laser 40
Michinari Shimoda and Tokuya Itakura: Scattering of Electromagnetic Plane Waves by Two Arbitrarily Oriented Conducting Plates 53
Yukio Honda, Masaaki Futamoto, and Kazuetsu Yoshida: Influence of Heat and Compression Treatment on Magnetic and Demagnetization Properties of CoCr Perpendicular Magnetic Recording Media 66
Hitoshi Matsuda, Osamu Takano, and Satoshi Furusawa: Effect of Mn-Codeposition on Electroless CO Alloy Magnetic Recording Films 76
Shintaro Kawai and Yoshinori Hatanaka: Light-Induced Degradation Characteristics of MIS Junction Using Hydrogenated Amorphous Silicon 85
Masayuki Takada and Tsukasa Yoneyama: Self-Injection Locked Gunn Oscillator Using Nonradiative Dielectric Waveguide 95
Yoshinori Endo and Tsukasa Yoneyama: Finite Element Analysis of Discontinuities in Nonradiative Dielectric Waveguide 102

NUMBER 12

Katsuya Manabe, Yasumitsu Miyazaki, and Takaaki Tanaka: An Analysis of Scattered Near Field and Induced Current of a Beam Wave by Pits on Optical Disk Using Boundary Element Method 1
Masahiro Hashimoto: The Law of Total Reflection in Geometrical Optics Based on Wave Normals 10
Yoshinari Ishido, Toshiyuki Shiozawa, and Susumu Ibaraki: Theoretical Analysis of the Cerenkov Laser Using a Nonlinear Dielectric Waveguide 20
Fumiaki Hanawa, Yoshinori Hibino, and Masaharu Horiguchi: Drawing Condition Dependence of Pure-Silica-Core Single-Mode Fibers 29
Toshiyuki Ohno, Fuminori Ishikawa, and Kunihiro Tamahashi: Properties of a-$Si_{1-x}C_x$:H Protector Surface-Layer for Electrophotographic Photoreceptor 40
Masayuki Yamamoto, Katsutoshi Yamaji, Keiichi Watazawa, Junji Inatani, Ryohei Kawabe, and Takashi Kasuga: Dual-Frequency (40/100 GHz) SIS Receiver for Nobeyama Millimeter-Wave Array 46
Motoshi Horita, Yasuhiko Kitajima, Zhiqiang Ma, and Gaishi Yamamoto: A Realization of a Wide-Band Second-Generation Current Conveyor by Using Complementary Transistors 56
Keiichi Miyairi and Ikuo Hanawa: Electroluminescence from Anodized Tantalum Pentoxide Thin Films 66
Eiji Fujii, Kohji Senda, Fumiaki Emoto, Akira Nakamura, Yasuhiro Uemoto, and Gota Kano: Planar Integration of Laser-Recrystallized SOI-Tr's Fabricated by Lateral Seeding Process and Bulk-Tr's and Its Application to Fabrication of a Solid-State Image Sensor 77
Mizushi Matsuda, Shinya Kuriki, Atsushi Matachi, Hideki Hasegawa, Katsuyoshi Hamasaki, and Tsutomu Yamashita: Analysis of Noise Properties of dc-SQUIDs 84
Motohiro Nakano, Kousuke Tsukamoto, Takeo Miyata, and Takayoshi Saitoh: A Continuously Calibrating Charge Redistribution A/D Converter 96
